**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Kapusnik et al (US 5,452,839).

Kapusnik et al disclose a welding apparatus and method of welding a stud onto a metal sheet comprising a hand held welding gun (2), a welding gauge (plate with 3 triangular holes and the middle hole for stud insertion), a positioner (24s) attached to the gun, wherein the element is a metal stud and can be welded to a metal sheet. The alignment feature is the welding gauge as shown in figure 1. The alignment feature is the hole or the pin on the welding gauge or the gun as shown in figure 1. The hole is adjustable, the positioner can be moved relative to the hole. The gauge has three alignment features. The positioner is inserted into the hole as shown in figure 1. The alignment features are placed in a triangle pattern around the element (figure 1).
